

SWYTCH™

One single phone - Make your team's life easier

Solution

Swytch is a cloud mobile network that offers mobile numbers on-demand to companies

Companies can now offer business mobile numbers to their teams without providing mobile phones.

Product

Swytch mobile numbers are hosted in the cloud. Companies can easily allocate and manage their numbers from an online dashboard, while teams use a simple app to communicate with them.

Virtual Numbers

Team's app

What are Virtual Numbers?

Swytch numbers are "SIM card free", which means they are not bound to hardware and are accessible from any connected device.

We work alongside one of the main UK mobile operator, so our numbers work in exactly the same fashion as any other UK mobile number. They are inclusive, SMS and call enabled and can also be used on third party services such as WhatsApp.

To start using Swytch, no change is required on either the company or the employees' side. Businesses register online and distribute mobile numbers to their teams, which are instantly available to employees via the Swytch app.

Scalable & flexible

— No additional handset

No need to purchase and carry around multiple handsets, everything works on your team's personal devices

— No commitment

Feel free to get and cancel any number at any time, flexibility is the key!

— Existing numbers port-in

Keep your existing business numbers by easily transferring them to Swytch

— Powerful features

Get powerful features on your mobile numbers, not available from a traditional operator.

— Landline numbers

Provide landline numbers to your employees too and merge all the cumbersome devices into a practical one

Online dashboard

The online dashboard provides you with control over your Swytch numbers ranging from scaling instantly your numbers stock to controlling access and permissions on an individual basis.

Easy management

— Instant allocation & transfer

Get new numbers instantly and transfer them easily between employees

— Usage analytics

Check live analytics on your company numbers usage

— Individual permissions

Provide your team with access to enhanced features according to their specific needs

— Cost control

Keep an eye on your company spending at any time

-  Custom availability
-  Smart call diverts
-  White & Black Listing
-  Virtual assistant
-  Desktop app
-  Voicemail and text by email
-  Company shared contact book
-  Communications analytics
-  CRM Integrations

How Swytch Works

Swytch calls use Voice over Internet Protocol (VoIP) capacities, which means they are transmitted over data on the Swytch user's end and delivered as a traditional call on the recipient's side. Swytch users are therefore able to communicate normally with any number in the world.

1. Company registers in minutes

2. Then invites employees

3. The team downloads the app

4. And can start using their numbers immediately

5. Company can access numbers analytics, allocate them to another employee

Instant registration

Companies need quick and easy access to mobile communications, therefore building an on-demand service was one of our main focus. It resulted in a very short and uncluttered sign-up process with instant access to mobile numbers thereafter.

of the Week

Digital Spy.

"The app is ideal for anyone who needs separate phone numbers for business and pleasure, but doesn't like the idea of shelling out for a second phone."

- Mark Langshaw, Digital Spy

 **GADGETTE**

"In terms of convenience, Swytch is a really easy way to get a second (or third, or fourth) phone number on your existing phone with no hassle."

- Holly Brockwell, Gadgette

What's everyone saying?

SWYTCH User

"Swtch is a winner. Practical. Easy to use. Actually using it every day more than I expected"

- Bes Joy-Day Stephensen

SWYTCH User

"Excellent. Having used VOIP comms and virtual numbers for several years (and many different providers) I can honestly say this is up there in the top two. Works flawlessly 5*"

- Max James
